

Papa John's Conveyor INSTRUCTION MANUAL

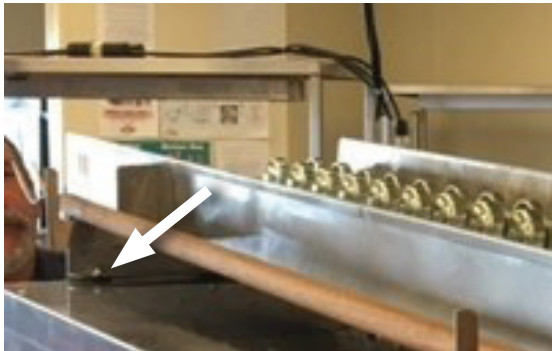

INSTRUCTIONS:

THE CONVEYOR REQUIRES TWO PERSONS TO LIFT IT INTO PLACE ON TOP OF THE OVEN

1. Clean the top of the oven.
2. The higher end of the conveyor is always positioned at the exit end of the oven. Center the two conveyor rails over the opening in the oven.

3. Secure the conveyor to the top of the oven using the suction cups under each end. This prevents the conveyor from sliding.

4. Insert the bubble fork into the two provided hooks.
