

CVap[®]

Smart, Sleek, Serious Street Cred.

Holding | Cook & Hold | Retherm

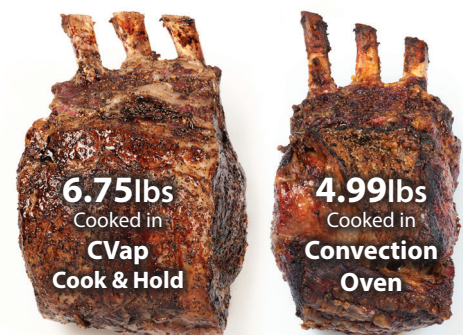

Smart - Improved controls make programming easy. Program your CVap[®] with an Android phone via the CVap Programming app*. Or upload firmware and download HACCP data through the USB port.

Sleek - Smooth curves, beautiful lines, and capacitive touch screen controls - this machine is ready for the front of the house.

Serious Street Cred - Beneath its smooth exterior beats the heart of a CVap beast. Get the reliable, repeatable rock star results you've come to expect from CVap, whether retherming, cooking, or holding.

What difference does it make?

The technology makes **ALL** the difference! Both prime ribs below started out at 7.13 lbs. But they emerged from the ovens substantially different.

Better yields, better food quality.
Reliable, repeatable results.

This Ain't Your Daddy's CVap® Cabinet!

We've improved on the CVap legacy.

USB/Audio Port - All that's needed is a USB thumb drive to upload the latest firmware, download HACCP data, or reprogram any of the eight channels. Plug a phone or MP3 player into the audio port, and you can crank up the music in the kitchen.

8 Programmable Channels - CVap equipment comes preprogrammed with the eight most popular settings. Does your menu require something different? No problem! It can easily be reprogrammed with the controls, via the CVap Programming desktop app and USB port, or with an Android device and the CVap phone app.

C-Touch Wheel - The capacitive touch screen control is simple and straightforward. Just touch the glass surface of the wheel and move your finger.

CVap Wireless Programming - Instantly program cooking or holding settings with an Android device utilizing the CVap Programming app.*
